

TESTIMONIALS: NOVAGRASSE PROPUTT & NOVAGRASSE COURSE GREEN

“I am delighted with my new Novagrasse ProPutt system! The installation and craftsmanship are quality and I have received the same compliments from all of my friends. I was able to use it some in late fall and cannot wait for Spring to arrive so that I can work on shaving some strokes off my game. I wouldn't hesitate to recommend the ProPutt system to a friend!”

Brent Clark, Bulk Plants, KY

“Our course was originally opened in 1993, for fishing! Six of the nine greens were under water as Waconda Lake experienced record level highs. Water was over these greens for several months and many local anglers had great success in catching catfish off the submerged greens! Once the lake level returned to normal, the greens were covered with 1-2” of silt. We let it freeze and thaw all winter; went in the Spring with a powerbroom and blew the silt dust away and applied topdressing. The only deterioration of the greens was a slight discoloration! We have now played on these Novagrasse Course Greens for 13 seasons.”

David Cunningham, Cawker City Golf Course
